

Ioannis Moutzouris-Sidiris is a Researcher at the University of the Aegean and a member of the MRSGroup. He holds a Bachelor degree in Environmental Engineering, a MSc in Hydrology and Water Resources Management and a MSc in Geography and Applied Geo-information. His late research includes the assessment of Chlorophyll-a Retrievals Algorithms from Sentinel-2 Satellite Data. Ioannis has worked for several companies in the fields of hydrological modelling and environmental monitoring. His research interests include application of remote sensing algorithms for the calculation of water quality parameters in coastal environments.
