

Vaggelis Filippou is a graduate in Oceanography and Marine Biosciences from the Department of Environment, University of the Aegean, and currently pursues an MSc in Geography and Applied Geo-informatics in the Department of Geography at the University of the Aegean. He specializes in oceanography with emphasis on remote sensing applications, contributing to the Marine Remote Sensing Group (MRSG). His practical experience includes field work for the Plastic Litter Project (PLP 2022-2025), *Posidonia oceanica* meadow research on plastic retention, and UAS data processing for marine litter digitization. His research interests include marine remote sensing, UAS data acquisition and processing, scientific diving, plastic pollution monitoring, coastal habitat mapping, geo-informatics, GIS mapping, and programming in Python and R. Vaggelis holds PADI Divemaster certification and UAS operator certifications for A1 and A3 categories, with active participation in HydroMediT 2024 conference.
